accenture

CONTEXT

When an employee leaves Accenture, **voluntary or involuntarily**, we carefully manage the accesses to ensure we uphold data security practices that are important for our clients and our business overall.

Controls will be applied to employee's accounts limiting access to sites containing Accenture's and its client´s proprietary information. Controls will be applied for preventing the download of information to personal devices or accounts. In addition, controls for preventing potential data loss through desktop email clients and personal webmail will be applied.

Departing employees will still be able to access most Accenture tools and applications from Accenture-managed or authorized devices.

HR ROLE

- HR has the function of **safeguarding** Accenture & client data.
- HR plays a simple but very important role in **supporting the Information Security Insider Threat Program** with this process.
- **Timely execution** is important because security controls are triggered once separation is completed in Workday.
- HR needs to provide **guidance to employee** if they have questions about their access or if they require some type of exception to the blocks applied.

Please take a few minutes to review this important information carefully

HOW HR SUPPORTS

INVOLUNTARY LEAVERS

1.a HR notifies the employee and completes separation in Workday (and local exits tool, if applicable)

- Notifier from business informs employee about the decision to separate him/her and HR communicates exit package/next steps.
- **Workday** (and local exit tools, if applicable) **should be updated ASAP,** following HR notification – the separation **kicks off the InfoSec controls** to change access levels of employee.
- **HR informs** the leaver about how he/she can **transfer his/her personal data**, what **information cannot be taken** as well as how to request an **exception to the InfoSec blocks**, if needed (see slide 6). For more conversation guidelines, review the "Talking Points for HR" slide.

VOLUNTARY LEAVERS

1.b Employee submits resignation and HR completes separation in Workday (and local exits tool, if applicable)

- **HR reviews employee resignation** and submits the **separation in Workday** (or local exits tool, if applicable). The separation **kicks off the InfoSec controls** to change access levels of employee.
- **HR informs** the leaver about how he/she can **transfer his/her personal data**, what **information cannot be taken** as well as how to request an **exception to the InfoSec blocks**, if needed (see slide 6). For more conversation guidelines, review the "Talking Points for HR" slide.

For voluntary leavers, access to sensitive **business applications are not blocked** by default. However, HR or business can request this additional block if needed (see slide 7).

TALKING POINTS FOR HR

01. As part of the exit process, **your access to some systems will be reduced.**

02. Information on which systems, applications are affected are in the attached document.

03. You will **still be able to perform your work**. If **additional access** is required for you to do your work, **an exception process is in place**.

04. There is a **baseline capability** in place to allow you to **remove your personal files**. Do **not wait until the very last day** of work to transfer your personal data.

05. If you **require more capability to remove a large amount of personal files/data**, an **exception process** is in place.

QA for departing employees (PH) v2

Key notes:

- These controls seek to limit data loss, not prohibit an individual's ability to continue performing their day-to-day responsibilities.
- Most Accenture tools and applications can still be accessed from Accenture managed or authorized devices.
- Attachments can be sent to most corporate email domains.
- Employees will be able to access their personal webmail via Proofpoint Email Isolation Browser, but cannot send attachments. However, they can request to have employee personal files be sent to their personal webmail by logging a request via Accenture Support.
- Policy 57 allows limited personal use of company devices. However, Accenture does not guarantee that any personal information stored by the employee will remain accessible and retrievable until employee's last day

Information Security Exceptions
Restore Access Request

There are two exception request options for leavers with Information Security Controls applied

- **Exceptions can be requested by or on behalf of the departing employee (note: approval notifications will be sent to departing employee)**

1. **Temporary (48 hrs) – Transfer Personal Files**

   - Valid for 48 hours upon submission
   - Will take 6-8 hours for access to be restored upon request
   - Requires MD acceptance and risk approval

2. **Long Term (until departure) - Continue Delivering Client or ACN Business Support**

   - Valid until departure
   - Will take 6-8 hours for access to be restored upon request
   - Requires leadership (CL6+) approval. If the employee's level is 6 or above, then a supervisor with a higher level will have to approve it.

Block Access to Business applications for Voluntary Leavers

In addition to the default controls applied to an individual's account during their exit process, access to critical business applications can also be blocked as an optional safeguard

- **HR or the employee's supervisor (Level 6 or above) can request this block**
- **Blocks access to the following business applications:**
  - SAP Business Reporting
  - Manage My Sales
  - Manage My Business
  - Manage My Engagement
  - Manage My Contracts
  - Insights Marketplace
- **Block is permanent until the departure**
- **You can revert a previous block request**

Restore Access Request for Outbound Access

If there's a business need, you can file for exemption:

In the Philippines, enhanced information security measures were implemented, supplementing the global security protocols. These measures include a restriction on sending emails from @accenture.com address to any non-@accenture.com domain (such as Gmail or client-specific emails).

Should there be a legitimate business requirement to restore your ability to send outbound emails, please adhere to the following:

For sending emails from @accenture.com to non-@accenture.com without attachments:

1. Confirm your intention to use the email solely for business purposes and your commitment to comply with Policy 0057 Acceptable use of Information, Devices and Technology
2. Obtain your Managing Director's acknowledgement of the risks and their approval regarding potential DLP incidents, which may include:
   - The transfer of Accenture or client information to personal email accounts (e.g. Gmail, Yahoo mail).
   - The dissemination of Accenture or client deliverables, reports and outputs to personal email accounts.
3. Submit the obtained approval and provide business case in this site: Exception Site - Blocking of Outbound Emails - All Items (accenture.com)

For sending emails from @accenture.com to non-@accenture.com **with attachments**:

1. Follow the aforementioned steps outlined in section A.
2. Log your request in this site: HR Information Security Access Exceptions - Home (accenture.com) – c/o Global HR
